

Kidzu is bringing Messy Morning to you!

Flower Power Suncatchers

Let the sun shine in!

Materials:
Gallon plastic bag
Hair gel
Flowers

1 - Send the kids outside to pick flowers, leaves and whatever bits of nature interest them.

2 - Squirt a small amount of hair gel into the plastic bag and arrange the flowers as desired in the bag. The gel will “set” their location.

3 - Tape the bag shut. Double bag if worried about leaks.

4 - Hang in a window preferably in a location reached by your child. They can observe the changes in light through the bag as well as “squish” and manipulate the flower positions.
